Total	112	89	85	-4%

Crime Severity Index (CSI)

CSI tracks the severity of reported crime in a jurisdiction. It tracks both the *amount* of crime as well as the *seriousness* of the crimes reported. Areas with a population close to 5000 people or less must review the results with caution as the lower the population the more easily a CSI value can be influenced by offences that are more serious in nature. The top three serious offences in this jurisdiction were B&E, Theft under \$5000 and Fraud. Nine of the top ten were property crime offences.

- Olds Provincial Detachment: 2018 = CSI **102** 2017 = **147** 30% reduction
- Olds Municipal Detachment: 2018 = CSI 78 2017 = 110 29% reduction
- Overall CSI in *Alberta* was **112** in 2018 (an increase of 2% from 2017).

Fleet Complete AT1

Cost-effective, low power LTE-M

One of the smallest and most cost-effective equipment trackers on the market, Asset Tracker AT1 provides you an unparalleled competitive insight over your high-value assets in the field. Instantly locate and check the status of machinery, equipment, tools and toolboxes, and more, all from your smartphone.

AT1 device runs on the LTE-M network bringing you faster status transmissions, a much longer battery life, and a reliable service. Equipped with humidity, temperature, light and impact sensors, AT1 gives you the mission-critical visibility without the need for onsite supervision. Remove the worry and guesswork from managing your assets, and empower your team to dedicate more focus to customer service and expanding business opportunities.

Innovative solutions for diverse business needs

- › **Construction services:** minimize instances of lost or stolen loading trailers, bobcats, generators and other machinery
- › **Transportation:** monitor the location and arrival/departure of trailers
- › **Paramedic and EMS services:** receive instant notifications of high-value tools left behind
- › **Trade services:** ensure all your high-value tools are never forgotten onsite
- › **Agricultural operations:** automate irrigation and other activities triggered by changes in environmental humidity and temperature

Key Features:

- › **Future-proof device:** The device runs on the LTE-M network and receives automatic software updates over the air.
- › **Multiple integrated sensors:** Built-in humidity, light, temperature and impact sensors are ready to operate off-the-shelf.
- › **Complete end-to-end system:** The solution includes a device, cloud IT, applications, data security, connectivity and customer support.
- › **Installs in seconds:** Using glue, double-sided tape or screws, the device is quick to install on any type of outdoor asset.
- › **Small size:** One of the smallest tracking devices on the market, AT1 can be covertly installed on various external assets.
- › **Rechargeable battery*:** The AT1 Solar can recharge its battery when exposed to direct sunlight.
