Global Calgary TV morning news show had a segment on stalkers getting information from home computers with cam recorders on PCs / laptops. What they do is hack into the computer and can see / record images through the cam recorder on your PC / laptop. Note – computer does not have to be turned on; and you do not have to give them access.

You can stop this by covering up the camera with a piece of black tape. Or power off the computer **AND close the lid.**
