

From Red Deer/Lacombe RCW: Farmer Outraged!

Posted August 10, 2017

From a farmer near Bentley

"As a farmer we work long hours and spend hundreds of thousands of dollars to take pride in our work of providing food for the world and doing the best we can. We fight Mother Nature against frost, hail, drought, and all sorts of other foes! We gleam with pride that the crop looks as good as it can prior to harvest and hope we get it in the bin.

Then someone thinks he has the right to have a road rally in our field, with his 4 x 4 leaving extensive damage! This kind of damage is ongoing and so frustrating!

The last photo is my untouched field."
